About Multivitamin Therapy...

Multivitamin therapy should combine the essential vitamins in direct relation to their respective minimal daily requirements.

(Council on Pharmacy and Chemistry and Council on Foods and Nutrition, J.A.M.A. 119:948, July 18, 1942).

The daily therapeutic dose of vitamins should be at least five times the maintenance requirements.

(Jolliffe, N., and Smith, J. J., M. Clin. North America 27:567, March 1943).

While individual vitamins have special functions, they are wisely administered together... in treating nutritional deficiencies.

(Spies, T. D., J.A.M.A. 122:497, June 19, 1943).

Provide *5 Times* the Minimal Daily Vitamin Requirements!

MULSAVITE®

CAPSULES

Therapeutic Potency Multivitamins

MULSAVITE-F®

CAPSULES

*Therapeutic Potency Multivitamins
Plus Folic Acid*

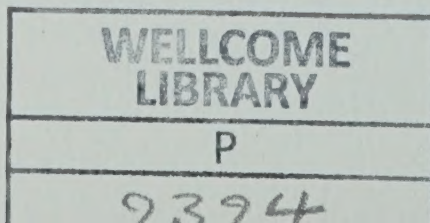

Both 'Mulsavite' Capsules and 'Mulsavite-F' Capsules *conform exactly* with clinical standards for balanced therapeutic multivitamin therapy.

Each preparation provides five times the F.D.A. recognized minimal daily vitamin requirements—and 'Mulsavite-F' also provides the hemopoietic effect of folic acid!

The physician need merely to increase the daily dosage or vary the frequency of administration of 'Mulsavite' or 'Mulsavite-F' to prescribe any multiple of five times the minimal daily vitamin requirements.

Compare 'Mulsavite' and 'Mulsavite-F' with the formulas of eight widely prescribed multivitamin preparations. Here is positive proof that 'Mulsavite' and 'Mulsavite-F' are superior for balanced therapeutic multivitamin therapy.

Indications

'Mulsavite' Capsules and 'Mulsavite-F' Capsules are indicated in treatment of concurrent multiple vitamin deficiencies. Capsules 'Mulsavite-F' are particularly useful when the physician wishes to include the hemopoietic effect of folic acid.

Both preparations are of supplemental value in pregnancy and lactation, diarrhea, pre- and postoperative states, restricted diets, cardiovascular-renal disease, convalescence, geriatrics, hyperthyroidism, anemias, malignancy, peptic ulcer, colitis, biliary disease, radiation therapy, severe infections and skin disorders.

Dosage

The average daily dosage of both preparations is one capsule or more as indicated by clinical findings and judgment.

Supplied

'Mulsavite' Capsules and 'Mulsavite-F' Capsules are supplied in bottles of 30 and 500.
